Introduction

The comprehensive Indiana School Improvement Plan aligns the improvement requirements for schools under Title I, PL221, and the Student Achievement Plan (SAP) for focus and priority schools.
Executive Summary
Introduction

Every school has its own story to tell. The context in which teaching and learning takes place influences the processes and procedures by which the school makes decisions around curriculum, instruction, and assessment. The context also impacts the way a school stays faithful to its vision. Many factors contribute to the overall narrative such as an identification of stakeholders, a description of stakeholder engagement, the trends and issues affecting the school, and the kinds of programs and services that a school implements to support student learning.

The purpose of the Executive Summary (ES) is to provide a school with an opportunity to describe in narrative form the strengths and challenges it encounters. By doing so, the public and members of the school community will have a more complete picture of how the school perceives itself and the process of self-reflection for continuous improvement. This summary is structured for the school to reflect on how it provides teaching and learning on a day to day basis.
Description of the School

Describe the school's size, community/communities, location, and changes it has experienced in the last three years. Include demographic information about the students, staff, and community at large. What unique features and challenges are associated with the community/communities the school serves?

DESCRIPTION OF SCHOOL

The Duneland School Corporation is a physically expansive school district in Northwest Indiana. Chesterton Middle School (CMS) serves a school community that includes the towns of Burns Harbor, Chesterton, Dune Acres, Porter, and parts of unincorporated northeast Porter County. CMS provides public education services to approximately 977 students, residing in a 92-square mile territory that includes the townships of Jackson, Liberty, Westchester, and portions of Pine Township.

Our school community is populated by approximately 13,000 residents. Based on 2010 U.S. Census Bureau data, the median age of the community is 37.8 years, with approximately 28% of the population being of school age. Roughly 50.9% of the 13,000 residents are female, and 49.1% are male. According to recent statistics, the community's population of 13,000 is approximately 91% white and 6.9% Hispanic. The remaining 2.1% of the population has been categorized as multiracial, black, or Asian.

Several additional socio-economic indicators help provide a sense of the composition of the school community's populace. Slightly less than 32% of the population has earned a high school diploma or equivalent, while 33% have attended college without earning a degree. 35% of the residents have earned some type of college degree. The predominantly blue-collar, middle-class community earns a median annual income of $57,700 and lives in a single-family home with an average market value of $158,000. Roughly 10.7% of Duneland households fall below the poverty line. The local workforce includes a diverse population of skilled and unskilled laborers, craftsmen, and professionals. Of the members of the Duneland community who are of working age, 52% earn a livelihood via a blue-collar career, while 41% hold white-collar positions. The remainder of the local workforce is currently unemployed.

Demographically, CMS’s student population is fairly reflective of the Duneland Community. According to the Indiana DOE, of the approximately 977 students enrolled in the middle school during the 2016-2017 school year, 82.8% were white. The remaining student body was 10.4% Hispanic, 3.3% multiracial, 2.2% black, and .9% Asian. Roughly 52% of the students were male, and 48% were female. During the 2016-2017 school year, roughly 84 seventh grade students and 76 eighth grade students received some form of special education services. This number represents approximately 16.4 % of the student population at-large.

The blue-collar, middle class traits of the community are also reflected in the free and reduced lunch rates at CMS, and in the Indiana Statewide Testing for Educational Progress (ISTEP) passage rate. The inverse correlation that exists between free and reduced lunch rates and passage rates on standardized tests is made apparent when examining the relevant data as it pertains to CMS. CMS has a total free and reduced population of 26.7%. 
School's Purpose

Provide the school's purpose statement and ancillary content such as mission, vision, values, and/or beliefs. Describe how the school embodies its purpose through its program offerings and expectations for students.

STATEMENT OF MISSION AND BELIEFS

The leadership team at Chesterton Middle School believes that 1) all students can learn a prescribed set of skills, 2) the desire to learn should be a lifelong venture, and 3) a school's educational program should have a net positive impact on the school-community. Based on these beliefs, the administrators, faculty and staff have created the following Mission Statement:

"Chesterton Middle School is dedicated to quality education and committed to developing lifelong learners who demonstrate responsibility, contribute to their community, and succeed in a changing world."

Our school embodies our purpose by offering a diverse selection of courses for a variety of student interests and ability levels. In addition, we offer numerous extracurricular activities and clubs that further develop lifelong learners. Finally, our expectations for students are reinforced through the implementation of our Student Achievement Plan that includes Project Effort and Project Success.
Notable Achievements and Areas of Improvement

Describe the school's notable achievements and areas of improvement in the last three years. Additionally, describe areas for improvement that the school is striving to achieve in the next three years.

NOTABLE ACHIEVEMENTS

Chesterton Middle School offers a diverse selection of courses for a variety of interests, and offers an array of support services for students with special needs. Courses are also offered to accommodate a variety of student ability levels including Gifted and Talented and High Ability courses. ISTEP Remediation, Response to Intervention (RtI), Study Island, and small group pullout services are available to students in need of more individualized support. English/Math based RtI is utilized each day for forty-five minutes, and is available for all students. In addition, for students who require substantially more individualized assistance, CMS also teams with the high school to offer a Bridges course for transitioning into the rigors of high school academic requirements.

Our school will add classroom sets of Chrome Books for student use starting this year. CMS has extracurricular opportunities to meet the unique learning needs of students. Project Effort and Project Success are ongoing and help ensure that we provide students with the necessary accountability and assistance to support academic success. We offer a wide variety of extracurricular activities and clubs that provide equity for all students in the development of learning, thinking and life skills. Examples of these include: Makers Club, Book Club, Science Olympiad, Performance Clubs, Robotics Club, Fish Club, Book Battle, STEM Club, History Club, Chess Club and Students Helping Others (SHO).

CMS also maintains a common grading policy: Summative = 50%, Projects/Quizzes = 30%, and Homework/Classwork = 20%. In addition, our teachers are utilizing standards to create common assessments, and summative reflection forms have helped to ensure consistent grading and reporting procedures. Summative Assessment Reflection data from our common assessments, and results from NWEA testing are also analyzed to improve instruction throughout the year. Finally, our school's Student Achievement Plan has helped to maintain a low number of failing grades as measured by our quarterly F Reports.

AREAS OF IMPROVEMENT

Despite Chesterton Middle School's strengths, data indicates that scores in specific skill areas, and particular subgroup categories have shown reason for concern. Data reveals that CMS's special education population fails to meet minimum State passing scores; for total population 8th grade math and ELA scores improved, but Special Ed scores dropped. It is noteworthy that, as part of the Porter County Educational Cooperative, CMS absorbs special education students who do not actually reside within the district. This artificially inflates CMS's special education population, thereby, negatively impacting the school's overall performance. In addition, direct instruction classes have been eliminated. Special Ed students have been moved into team taught classes or general education classes in English and math. The drop in scores correlates to the change in structure. Regardless, the lack of improvement within this subgroup must be addressed. The other subgroup concern would be the performance of our increasing SES population; these scores also dropped, but for 8th grade only. The seventh grade SES scores saw a very slight increase. We need continue to evaluate the effectiveness of the services that we provide to our SES students in order to better meet their needs in the future.

Feedback from our Duneland Community Surveys identified additional areas of concern, and offers potential explanations as to why certain scores have declined. CMS faculty feedback suggested that student Problem-Solving and Reading Comprehension skills currently fall below
classroom expectations. Staff surveys also indicated a need for CMS to provide training to ensure that all staff members are prepared to evaluate, interpret and use data. Parent feedback indicated a need for our school's leaders to engage more effectively with all stakeholders regarding our school's purpose and direction.

In addition, the most recent test data reveals that specific areas and subgroup categories need to become the focus of school improvement. This does not mean an abandonment of the current approach, but rather specific revisions must be made to the current plan. In particular, a vertical review of the data indicates that Genres, Writing Process, Research Process skills must become a focus within the Language Arts domain of the school improvement plan. Geometry and Measurement/Mathematical Process skills will require a similar focused approach within the Mathematics domain. Furthermore, a horizontal review of the data indicates that increased human and financial resource allocation must be devoted to the free/reduced lunch, and special education populations. Utilizing a more focused approach concerning these specific skill areas and subgroups of concern will provide the necessary tools to help these students succeed.
Additional Information

Provide any additional information you would like to share with the public and community that were not prompted in the previous sections.

As part of the Duneland School Corporation, Chesterton Middle School participates in the AdvancEd district accreditation process. An integral component to Duneland's district accreditation model is the role that the District Internal Review Team (DIRT) plays in the internal review process. Duneland utilizes an annual review protocol where each school principal and internal chair person(s) provide a written and verbal report to DIRT on the progress of the school. DIRT then provides a written response to each school and the district noting strengths, commendations, suggestions and opportunities for improvement, and required actions. Oversight of the DIRT process is provided by a larger Steering Committee who also hears annual reports from goal committees.

Duneland's process consistently includes input from all stakeholder groups. AdvancEd surveys were conducted during the 2014-2015 school year. Upon completion, survey data was provided to each individual school to analyze and utilize for future planning with emphasis on successes and challenges. Surveys provided valuable insight from families, staff, and students.
Improvement Plan Stakeholder Involvement
Introduction

The responses should be brief, descriptive, and appropriate for the specific section. It is recommended that the responses are written offline and then transferred into the sections below.
Improvement Planning Process

Describe the process used to engage a variety of stakeholders in the development of the institution's improvement plan. Include information on how stakeholders were selected and informed of their roles, and how meetings were scheduled to accommodate them.

We engage a variety of stakeholders in the development of our improvement plan by asking for parent volunteers during registration to serve on our School Improvement Committee [SIC], in addition to having teacher and administrator representation on the committee as well. Teachers serving on the SIC as well as the School Improvement Team [SIT] are representatives from each department, including Guidance. Finally, meetings alternate scheduling during the morning before school or in the afternoon at the end of the school day in order to accommodate member's schedules.

Members serve on subcommittees to distribute the work that needs to be completed each year. Subcommittees include Professional Development, Data, and Community Relations. These committees do the bulk of the work that the SIC deems necessary.

Describe the representations from stakeholder groups that participated in the development of the improvement plan and their responsibilities in this process.

Community input is gathered through AdvancEd surveys, and also through representation on our SIC. Students are also represented through the AdvancEd surveys. Our School Improvement Team has developed subcommittees in order to more specifically focus on areas of improvement. We currently have a Professional Development Subcommittee, a Data Subcommittee, and a School Community Relations Subcommittee. In addition to representation on the SIT, teachers are also participants through AdvancEd surveys, department meetings, professional development workshops, and staff surveys.

Explain how the final improvement plan was communicated to all stakeholders, and the method and frequency in which stakeholders receive information on its progress.

Our school improvement plan is communicated to all stakeholders through various channels, such as e-mail, Canvas, and the CMS webpage. Our SIT and SIC meetings will continuously assess and evaluate any necessary improvements that need to be made in our plan. We have data walls in our main, high traffic areas for stakeholders to monitor our progress. The entire plan is made available on our school's website, and teachers will continuously discuss our school's progress in department meetings, professional development workshops and through surveys.
Self Assessment
Introduction

AdvancED’s Self Assessment (SA) diagnostic is based on the AdvancED Standards of Quality, which serves as the foundation of the accreditation and continuous improvement process. The SA is a valuable tool for collaboratively engaging staff members and stakeholders in purposeful, honest dialogue and reflection to assess the institution’s adherence to the Standards, and guide its continuous improvement efforts. The SA includes the institution’s self-ratings of and the evidence cited for each of the indicators, comments that explain the indicator’s ratings and an overall narrative for each Standard. The results of the SA are reviewed by the External Review Team as one essential component of the preparation process for the institution’s External Review.
Standard 1: Purpose and Direction

The school maintains and communicates a purpose and direction that commit to high expectations for learning as well as shared values and beliefs about teaching and learning.

Overall Rating: 4.0

Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing.

Cite sources of evidence External Review team members may be interested in reviewing.

Our staff is committed to student success as evidenced by our documentation and decision making. By utilizing data collected from NWEA, PSAT, Common Assessments, Pre and Post-test results, and Summative Assessment Reflection Forms to guide instruction, we promote student success. The staff has the tools needed to support student success, and the administration creates a positive environment of accountability. The staff utilizes Project Effort and Project Success to support student learning.

| 1.3       | The school's leadership implements a continuous improvement process that provides clear direction for improving conditions that support student learning. | School leaders require the use of a documented, systematic continuous improvement process for improving student learning and the conditions that support learning. All stakeholder groups work collaboratively and consistently in authentic and meaningful ways that build and sustain ownership of the school's purpose and direction. School personnel systematically maintain, use, and communicate a profile with current and comprehensive data on student and school performance. The profile contains thorough analyses of a broad range of data used to identify goals for the improvement of achievement and instruction that are aligned with the school's purpose. All improvement goals have measurable performance targets. The process includes action planning that identifies measurable objectives, strategies, activities, resources, and timelines for achieving all improvement goals. School personnel hold one another accountable for and evaluate the overall quality of the implementation of all interventions and strategies. The process is reviewed and evaluated regularly. Documentation that the process is implemented with fidelity and yields improved student achievement and instruction is available and communicated to stakeholders. | •The school data profile  
•Agenda, minutes from continuous improvement planning meetings  
•Communication plan and artifacts that show two-way communication to staff and stakeholders  
•The school continuous improvement plan | Level 4 |
## Standard 2: Governance and Leadership

The school operates under governance and leadership that promote and support student performance and school effectiveness.

| 2.2       | The governing body operates responsibly and functions effectively.                  | The governing body has a process to ensure that its decisions and actions are in accordance with defined roles and responsibilities, a code of ethics, and free of conflict of interest. Governing body members participate in a systematic, formal professional development process regarding the roles and responsibilities of the governing body and its individual members. The governing body complies with all policies, procedures, laws, and regulations and functions as a cohesive unit. | • Communication plan to inform all staff on code of ethics, responsibilities, conflict of interest  
• Proof of legal counsel  
• Assurances, certifications  
• Findings of internal and external reviews of compliance with laws, regulations, and policies  
• Communications about program regulations  
• Governing body policies on roles and responsibilities, conflict of interest  
• Governing code of ethics | Level 3 |
### Indicator 2.3
**Statement or Question:** The governing body ensures that the school leadership has the autonomy to meet goals for achievement and instruction and to manage day-to-day operations effectively.

**Response:** The governing body consistently protects, supports, and respects the autonomy of school leadership to accomplish goals for achievement and instruction and to manage day-to-day operations of the school. The governing body maintains a clear distinction between its roles and responsibilities and those of school leadership.

**Evidence:**
- Roles and responsibilities of school leadership
- School improvement plan developed by the school
- Stakeholder input and feedback
- Communications regarding board actions
- Survey results regarding functions of the governing body
- Agendas and minutes of meetings

**Rating:** Level 4

---

### Indicator 2.4
**Statement or Question:** Leadership and staff foster a culture consistent with the school's purpose and direction.

**Response:** Leaders and staff align their decisions and actions toward continuous improvement to achieve the school's purpose. They expect all students to be held to high standards in all courses of study. All leaders and staff are collectively accountable for student learning. School leaders support innovation, collaboration, shared leadership, and professional growth. The culture is characterized by collaboration and a sense of community.

**Evidence:**
- Examples of collaboration and shared leadership
- Survey results
- Examples of decisions aligned with the school's statement of purpose
- Examples of decisions in support of the school's continuous improvement plan
- Professional development on early release days is determined by the school's purpose and direction.

**Rating:** Level 3

---

### Indicator 2.5
**Statement or Question:** Leadership engages stakeholders effectively in support of the school's purpose and direction.

**Response:** Leaders communicate effectively with appropriate and varied representatives from stakeholder groups, provide opportunities for stakeholders to shape decisions, solicit feedback and respond to stakeholders, work collaboratively on school improvement efforts, and provide and support meaningful leadership roles for stakeholders. School leaders’ efforts result in measurable, active stakeholder participation; engagement in the school; a sense of community; and ownership.

**Evidence:**
- Minutes from meetings with stakeholders
- Copies of surveys or screen shots from online surveys
- Survey responses
- Involvement of stakeholders in a school improvement plan
- Communication plan
- The school holds orientation for incoming students and parents.

**Rating:** Level 3

Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

The curriculum, instruction, and assessment at Chesterton Middle School are monitored and adjusted systematically in response to data from multiple assessments of student learning and an examination of professional practice. Through reflective practices teachers are able to differentiate instruction to better meet the needs of their students. We have incorporated reflection forms that can be used formatively to better prepare students for summative assessments, and used with summative assessments to compile trend data. Teachers are engaging their students in learning through instructional strategies that ensure achievement of learning expectations. An area of improvement would be the full integration of technology throughout the learning process. With that said, teachers are moving towards integrating technology as instructional resources and learning tools on a day to day basis. Opportunities exist in Duneland to receive professional development for NWEA, Twitter, Pinterest, Canvas, Remind, and Google platform to achieve this goal.

### Indicator 4.4

**Statement or Question**: Students and school personnel use a range of media and information resources to support the school’s educational programs.

**Response**: All students and school personnel have access to an exceptional collection of media and information resources necessary to achieve the educational programs of the school. Qualified personnel in sufficient numbers are available to assist students and school personnel in learning about the tools and locations for finding and retrieving information.

**Evidence**:
- Budget related to media and information resource acquisition
- Data on media and information resources available to students and staff
- Schedule of staff availability to assist students and school personnel related to finding and retrieving information
- Co-teaching between media center specialist and classroom teachers utilizing media resources.
- Grant to purchase 3-D printers

**Rating**: Level 4

### Indicator 4.5

**Statement or Question**: The technology infrastructure supports the school’s teaching, learning, and operational needs.

**Response**: The technology infrastructure meets the teaching, learning, and operational needs of all stakeholders. School personnel develop and administer needs assessments and use the resulting data to develop and implement a technology plan to improve technology services and infrastructure.

**Evidence**:
- Technology plan and budget to improve technology services and infrastructure
- Policies relative to technology use
- Chrome books this year for classroom use in 4 core areas

**Rating**: Level 3

### Indicator 4.6

**Statement or Question**: The school provides support services to meet the physical, social, and emotional needs of the student population being served.

**Response**: School personnel implement a process to determine the physical, social, and emotional needs of each student in the school. School personnel provide or coordinate programs to meet the needs of students as necessary. Measures of program effectiveness are in place, and school personnel use the data from these measures to evaluate all programs. Improvement plans related to these programs are designed and implemented when needed to more effectively meet the needs of students.

**Evidence**:
- Agreements with school community agencies for student-family support
- Social classes and services, e.g., bullying, character education
- List of support services available to students

**Rating**: Level 3
Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

Our highest indicator is 4.4: The school provides excellent media services with both a full time media specialist and a media assistant. Teachers schedule time to conduct lessons in the media center over a variety of topics including orientation, research, and movie-making.

Many of the sub-categories for this standard were marked 3's because our school does an excellent job of providing support to our students, but systems for documentation are not currently in place.

Our guidance department utilizes multiple assessments to identify our students’ needs and guide their educational process at CMS. In order to accommodate a variety of student ability levels, our Gifted and Talented and High Ability courses, ISTEP Remediation, Response to Intervention (RtI), and small group pull-out services are all available to students in need of more individualized support. In terms of educational and career planning, the 8th grade classes are provided with a Reality Store experience, Drive of Your Life Program, assistance in the creation of their four year education plan, as well as referrals for a Bridges course for those needing additional assistance with the transition to high school demands. These opportunities help students in their lives beyond the middle school, and hopefully provide insight to help guide them in the future.

Category 4.2 states instructional time, material resources, and fiscal resources are sufficient to support the purpose and direction of the school. After reviewing the school budget, calendar, and daily schedule, we find that CMS maximizes its resources. Our instructional time and materials meet our needs, and sometimes surpass them.

Section 4.5 states that technology infrastructure is modern, fully functional, and meets the teacher, learning, and operational needs of all stakeholders. Currently, nearly all classrooms have technology requests that have been met. Some of our present technology is outdated or does not work properly. However, the construction of the building presents challenges to updating our systems in a cost effective manner. The District has a plan outlined for the next few years. In addition, the infrastructure is being updated to improve the wireless service in the building. We are also moving towards implementing a 1:1 learning environment which will make replacement of outdated computer labs unnecessary.
Standard 5: Using Results for Continuous Improvement

The school implements a comprehensive assessment system that generates a range of data about student learning and school effectiveness and uses the results to guide continuous improvement.

Overall Rating: 3.6

• List of data sources related to student learning, instruction, program effectiveness, and conditions that support learning | Level 4 |
| 5.3       | Professional and support staff are trained in the evaluation, interpretation, and use of data. | All professional and support staff members are assessed and trained in a rigorous professional development program related to the evaluation, interpretation, and use of data. | • Professional learning schedule specific to the use of data  
• Documentation of attendance and training related to data use  
• Training materials specific to the evaluation, interpretation, and use of data | Level 3 |
Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

Teachers and administrators at CMS are using ISTEP, NWEA, PSAT, Pre and Post-tests, and class room assessments to determine verifiable improvement in student learning and to drive instruction. In addition, data is utilized to identify students for the Bridges program to enhance the probability of success for our students at the high school level.
Based on our feedback from teacher surveys, we increased teacher training opportunities in the analysis of data. We have also implemented additional documentation of the use and effects of data driven instruction.
Student Performance Diagnostic
Introduction

The Student Performance Diagnostic provides an institution with a process to report summative student assessments. This diagnostic is significant to the accreditation and continuous improvement process as it serves as a resource for schools to view content area assessment results required by the state, district, or other entities, determine the quality and reliability of the given assessments, and show the alignment of the assessments to the school's curriculum. The performance level computed at the completion of the diagnostic is used by the external review team as a comprehensive report to understand fully the institution's assessment program; the diagnostic should be used in the same manner by the institution as it engages in improvement planning.

</thead>
<tbody>
<tr>
<td>1. Assessment Quality</td>
<td>The array of assessment devices used by the institution to determine students' performances is sufficiently aligned so that valid inferences can be reached regarding students' status with respect to the entire set of curricular aims regarded as high-priority, &quot;must accomplish,&quot; instructional targets. The documentation provided in support of this alignment is persuasive. All of the assessments used are accompanied by evidence demonstrating that they satisfy accepted technical requirements such as validity, reliability, absence of bias, and instructional sensitivity.</td>
<td>Level 4</td>
</tr>
<tr>
<td>2. Test Administration</td>
<td>All the assessments used by the institution to determine students' performances, whether externally acquired or internally developed, have been administered with complete fidelity to the administrative procedures appropriate for each assessment. In every instance, the students to whom these assessments were administered are accurately representative of the students served by the institution. Appropriate accommodations have been provided for all assessments so that valid inferences can be made about all students' status with respect to all of the institution's targeted curricular outcomes.</td>
<td>Level 4</td>
</tr>
<tr>
<td>3. Quality of Learning</td>
<td>Evidence of student learning promoted by the institution is well analyzed and clearly presented. In comparison to institutions functioning in a similar educational context, students' status, improvement, and/or growth evidence indicates that the level of student learning is substantially greater than what would otherwise be expected.</td>
<td>Level 4</td>
</tr>
<tr>
<td>4. Equity of Learning</td>
<td>Evidence of student learning indicates achievement gaps exist among subpopulations of students, and these achievement gaps demonstrate a modest decline.</td>
<td>Level 2</td>
</tr>
</tbody>
</table>
Areas of Notable Achievement

Which area(s) are above the expected levels of performance?

Our 7th and 8th grade general educations students, paid lunch students, white students, and female students continue to achieve above expected levels of performance.

Describe the area(s) that show a positive trend in performance.

Our 7th and 8th grade general educations students, paid lunch students, white students, and female students show a positive trend in performance.

Which area(s) indicate the overall highest performance?

The highest gains were made by females. 8th grade females showed an improvement of 4% in English and 5% in math. 7th grade females showed a 5% increase in math.

Which subgroup(s) show a trend toward increasing performance?

Female 8th grade students increased performance in English and math. Female 7th grade students showed increased performance in math.

Between which subgroups is the achievement gap closing?

Males in 7th grade English are closing the achievement gap. Also, in 7th and 8th grade English and math, multiracial students are making gains in achievement.

Which of the above reported findings are consistent with findings from other data sources?

The improvement in the total pass rate for English corresponds to improvement in reading comprehension as demonstrated by our pre and post-test results. The increase in the total pass rate for math only occurred in 7th grade and our pre and post-test results for problem-solving showed more modest gains than in English.
Areas in Need of Improvement

Which area(s) are below the expected levels of performance?

In 7th and 8th grades English, Writing: Genres, Writing Process, Research Process are below the expected level of performance. In 7th and 8th grades math, Geometry and Measurement and Mathematical Process are below the expected level of performance.

Describe the area(s) that show a negative trend in performance.

The areas with negative trends in performance for both 7th and 8th grades are Geometry and Measurement, Mathematical Process, and Writing: Genres, Writing Process, Research Process.

Which area(s) indicate the overall lowest performance?

The areas with the lowest overall performance for both 7th and 8th grades are Geometry and Measurement, Mathematical Process, and Writing: Genres, Writing Process, Research Process.

Which subgroup(s) show a trend toward decreasing performance?

Free/reduced lunch subgroup shows a trend toward decreasing performance in 8th grade English and math and 7th grade math. For Special Ed both grades show a trend toward decreasing performance in English and math.

Between which subgroups is the achievement gap becoming greater?

The achievement gap has become greater between paid and free/reduced lunch subgroup in 8th grade and between regular ed and special ed. 7th grade males dropped 2% in math.

Which of the above reported findings are consistent with findings from other data sources?

NWEA results support our findings in math with Geometry and Measurement being the lowest category tested. In English, however, we see that there is a difference between 7th and 8th grade findings. In 7th grade English Writing and Grammar have the lowest scores. In 8th grade English, Literature and Non-fiction are the lowest categories.

Stakeholder Feedback Diagnostic
Introduction

The Stakeholder Feedback Diagnostic is designed to analyze the institution's survey results in terms of areas of achievement and areas that need improvement. Further, the diagnostic is essential to the accreditation and continuous improvement processes in that it provides the institution with a comprehensive view of the aggregate scores of the surveys administered, and the actual total of respondents for each survey type to derive a single score for this diagnostic. The performance level score computed at the completion of the diagnostic is used to broaden and enhance the external review team's understanding of the stakeholder's perceptions of the institution; the diagnostic should be used in the same manner by the institution as it engages in improvement planning.

</tbody>
</table>
Areas of Notable Achievement

Which area(s) indicate the overall highest level of satisfaction or approval?

Stakeholders show the highest level of approval of the variety of programs CMS offers to students and families.

Which area(s) show a trend toward increasing stakeholder satisfaction or approval?

Stakeholders show a trend of increasing approval of communication.

Which of the above reported findings are consistent with findings from other stakeholder feedback sources?

Professional development surveys are consistent with stakeholder approval of a variety of options for our students.
Areas in Need of Improvement

Which area(s) indicate the overall lowest level of satisfaction or approval?

Our lowest level of satisfaction is the dress code policy that is currently in place.

Which area(s) show a trend toward decreasing stakeholder satisfaction or approval?

Our high ability selection process is showing a trend toward decreasing stakeholder satisfaction.

What are the implications for these stakeholder perceptions?

We receive an increasing number of appeals from parents regarding placement in high ability classes.

Which of the above reported findings are consistent with findings from other stakeholder feedback sources?

Stakeholders would like more communication from administration.

Goal 1: Goals and Plans 2017-2018

Measurable Objective 1:
A 2% increase of All Students will increase student growth in reading comprehension in English Language Arts by 05/31/2018 as measured by ISTEP results.

Strategy 1:
Close Reading Strategy - Students will annotate reading passages across the curriculum at 4 or more points during the year.
Research Cited: Patricia Kain, for the Writing Center at Harvard University
Evidence of success: Reading comprehension pre and post test.

Conclusion

The Indiana School Improvement Plan is designed to be comprehensive and for continuous improvement. Systemic use and consistent reflection are encouraged to update the status of the goals in order to make school improvement continuous and actionable.
