New State Vaccination Requirements for Students for Fall 2014 **The Porter County Health Department would like to remind parents:**

Indiana has approved new vaccine requirements for incoming Kindergarten and Grade 12 students effective for the Fall Semester of 2014.

- Kindergarten students - need 2 doses of Hepatitis A vaccine in addition to the previously required vaccines.
- Students entering grade 12 - need an additional dose of Meningococcal vaccine if they received one dose prior to age 16.
- Graduating seniors (Class of 2014) may also need an additional meningococcal vaccine for college entry in the Fall.

Porter County Health Department offices offer all of these vaccines to patients who have private insurance, Medicaid coverage, or those who are uninsured.

Day and evening appointments available. Don't wait until August to get your student updated, call our office today.
